

Sprint 1 report

Product Name: Fresh Potatoes

Team Name: HPPH

Sprint 1 due: Feb 04 2018

Revision number: 1

Revision date: Feb 04 2018

Actions to stop doing:

Team members are satisfied with current process. For the sprint 1, our mainly goal is to familiar with needed languages and skills, and build basic frame for the web page and database. Therefore, everything goes well currently.

Actions to start doing:

The team should have more group meeting and group working. We split team into two small teams. One team is working on web page, the front-end. The other team is working on back-end, the database. To schedule more group meeting can make the team more productivity.

Actions to keep doing:

This team should keep learning basic languages and skills for the website. Also, this team should continue discussing with each other through Wechat.

Work completed:

1. As a developer, I need to learn basic languages and skills for building a website

We need to learn HTML5, CSS and Flask framework.(10)

2. As a front-end developer, I need to build a basic web frame and raw web pages.

We will add basic element to the web page such as navigation bar, body div. (3)

3. As a user, I want to be able to create an account, and be able to login to the website.

We will implement a function to check user email and password if valid. (1)

Work not completed:

1. As a user, I want to be able to create an account, and be able to login to the website.

We will import Firebase API and use email authentication for user registration. (1)

We decide to not use Firebase as our database to store username and user information due to Firebase not support connecting with Flask framework. We now try to set up a SQL database to keep the user information and using it for user login and signup actions.

Work completion rate:

total user stories completed: 2/3

Total User Story Tasks Completed: 14/15

Final Burn Up Chart:
