

Sprint 4

Project Name: Fresh Potatoes

Team Name: HPPH

Sprint 4 due: Mar 16

Revision number: 1

Revision date: Mar 7

Goal

We will implement a movie data website including movie information and box office. Users can create their own movie watching timeline.

User Stories

1. (6) As a developer, I need to finish the “generate movie tickets” function.

We have built a function, in order to make a “ticket generator” for our website.

Total user story: 6 hours

2. (6) As a front-end developer, I need to implement movie searching feature.

We need to create the searching feature, so that users can search movies by categories.

Total user story: 6 hours

3. (4) As a user, I want to be able to generate movie tickets online.

We need to allow users to generate their own movie tickets online by the movies they have watched, so that they could make their tickets for their favorite movies and keep such tickets.

Total user story: 4 hours

Team Role

Li Jiang (product owner)

Haoran Liang (developer)

Weiyi Xia (developer)

Xuanyi Zhang (developer)
