2. After logged in, go to any movie detail page.
3. Click 'WATCHED' button
4. Then the watched movie will show on user's gallery page.

User story:
   As a user, I want to be able to rate movie and give comments.
Scenario:
1. Click any movie's name or poster.
2. Will be redirect to movie detail page.
3. Enter comments in the comments textarea. And submit
4. Users can view their comments and other users comments about the movie.

Sprint 4
User story:
   As a front-end developer, I need to implement movie searching feature.
Scenario:
1. Click 'SEARCH' on the navigation bar
2. Enter the movie that want to be searched
3. The searched movie will show on the following page

User story:
   As a user, I want to be able to generate movie tickets online.
Scenario:
1. Click 'TICKET' on the navigation bar
2. Enter the information about a movie such as theatre name, date, row number etc.
3. Click save as pdf and then a ticket is created.

Restrictions:
1. Users cannot edit their account information such as change password.
2. The search function does not provide fuzzy search.
3. For new movies which do not have full movie data need to be saved in database by hand.
4. For editor recommend section, currently is finished in HTML file, not from database.

Bugs:
1. Download tickets will show the entire html page.
